

**Seminar on Battery Container Operation in Taicang Port
April 15th-16th 2025**

On April 15, 2025, Sunrise Logistics Japan invited many experts in the dangerous goods transport industry to gather at Taicang Port to conduct a special study on the international transport operation of battery container.

International shipowner, shipping agents, freight forwarders, customs clearance companies holding AEO certificates, professional battery container logistics service providers, and professional truck companies from mainland China, Japan, and Taiwan discussed operation details on the battery container transport and reached a consensus on future business cooperation.

Attendees went to Taicang Port to observe the storage and terminal operation of the battery containers the second day.
